

Hello Jeff,

It was nice to hear your voice again over the phone. I hope that everything is indeed well with you and your family.

I really have only a few WREGIS questions. Here they are:

1. As we discussed over the phone, I have some long standing concerns as to how obligations of the WECC under the CEC-WECC contract could interact or even trump assurances provided in the TOU. The foremost example that I can think of has to do with treatment of confidential information provided to the WECC. So, for example, does the CEC-WECC contract obligate the WECC to deliver any confidential information to the CEC (or any other government agency) that might be subject to different processes for disclosure under the CEC's (or other agency's) laws?
2. I am also a bit concerned that language in Recital 10 has been watered down a bit and made less clear that WREGIS is really the WECC doing business as WREGIS. In other words WREGIS is WECC. Has there been any retreat from that position since the TOU was published last June?

Those are my 2 primary concerns. Maybe I'm just worrying over nothing but any information you can dig up for me on about them would be appreciated.

Kind regards,

Bill
