#### **II. Introductions**

#### **III. Agenda Review/ Additions**

#### **IV. Items for Review**

##### **A. PCR – 186: Retroactive Creation of WREGIS Certificates for Periods in Excess of 75 Days Prior to Registration.**

- Discussion on pros vs. cons led by J. Weinstein.
- Comments previously submitted for discussion on PCR 186 are currently posted to the WREGIS website. Additional comments due by July 1, 2011.
- K. Zocchetti – CEC suggests that if there are a few cases, they should be treated on a case by case basis. There has been plenty of notice for generators to register in a timely manner, and don't see much excuse for having to go back after the fact and retroactively produce RECs. Clarification on CEC comments.
- CPUC – Discussion on mitigating the risks, and concern with not wanting to compromise the integrity of the WREGIS program.
- Discussion on paying for a penalty and/or incurring fees to use the functionality.

## **WREGIS Stakeholder Advisory Meeting**

June 7, 2011

10:00 am - 11:00 am (PT)

11:00 am - 12:00 pm (MT)

Conference Bridge #: (760)-569-6000

Pass code: 168380 #

- R. Terada (CRS) – discussion on auditing (Green-e perspective).
- Discussion on timeline of process and how to move forward – SAC will put the item on the next SAC agenda to vote on or continue to discuss at July meeting.

### **V. Additions to Agenda**

#### **A. Environmental re-dispatch (Steve Johnson)**

- Concern with environmental re-dispatch is that there may be mismatch between E-Tags and recording of generation at WREGIS. Concerns in the NW on the issue, and SAC would like WREGIS to comment.
- There is no issue in WREGIS because they are still marked how they need to be.
- BPA to write up response explaining the issue and submit to WREGIS.
