Type of Change/Request:			
Title of Change/Request:	Test Energy date extension		
Priority:	<input type="checkbox"/> Urgent	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium <input type="checkbox"/> Low
Target Date:	11/30/2010		

Requested By: Jeremy Weinstein/WREGIS Staff	Phone Number: 925-943-3103
E-mail Address: jeremy.weinstein@pacificorp.com	
Organization: PacifiCorp	

Description:

Allow generation from new generators the same window as existing generators upon registration to account for test energy.

APX Response:

Rational / Benefit / Need:

Currently, WREGIS only allows test energy to create certificates if produced during the month of COD. This means that new generators are not being appropriately credited for renewable generation that they are producing during test phase. This change would apply the same backloading window to new generators as is currently allowed for existing generators, meaning the availability of test generation would depend upon the registration date of the generator.

Consequences of Not Implementing Change:

Test energy, currently accepted by several states as usable in RPS compliance, cannot be appropriately tracked through WREGIS.

Deliverables:

Estimate for Scheduled Release:

Cost Impact:

Total Cost Estimate:

Risk and Issues Involved:

The only identified issue would be that test phase for some resources could be longer than the approximately two months this change would allow for test energy to be uploaded.

External Impacts:

This would allow for more test energy to be tracked through WREGIS rather than by attestation.
